

We added a 6000 square foot floor and dedicated it to the New York Metropolitan Area's Premier Veterinary Rehabilitation Service!

Valley Veterinary Rehabilitation is a purposefully designed, internationally known facility with experienced, qualified Veterinary Rehab Nurses and the newest, **proven** state of the art veterinary rehabilitative equipment. All rehabilitation examinations and treatment plans are done by a licensed doctor of veterinary medicine with six years experience in veterinary physical rehabilitation, trained and certified at the University of Tennessee.

Convalescing patients receive individualized treatment plans promoting a speedy, productive recovery for them, and a worry-free experience for you and your clients. We are only 20 minutes from the Lincoln Tunnel.

For more information on how we can help your patients, visit
